<https://github.com/Pribm>

My name is Paulo and I have 3 years of hands-on experience in Laravel/PHP and ReactJS, I possess a comprehensive understanding of modern web development frameworks and technologies. I excel in building robust and scalable applications, delivering projects on time while meeting client expectations. Additionally, my 10 years of experience in the design field have provided me with a deep understanding of visual communication, branding, and user experience. By combining technical knowledge with my design skills, I bring a unique perspective to web development, creating intuitive and visually appealing interfaces.
