PAULO VINÍCIUS RIBEIRO MONTEIRO

Hi, I'm Paulo and I love new challenges, learning new things and meeting new places and people. Currently, I'm studying web development focused on PHP/Laravel for the backend and Javascript/React for the frontend. Since I started studying, I've always turned to developing personal projects, projects for close friends and for my current job, looking for discover new approaches and challenges beyond that came across during the learning process. At the moment I'm looking for a job that can give me the opportunity to discover new challenges in the area of web development, I'm currently studying NodeJs and hope to apply the new acquired knowledges as soon as possible.

SKILLS

Skills: HTML, CSS, SASS, Bootstrap, Javascript, JQuery, React, Redux, Material UI, PHP, Laravel, Adobe Photoshop, Adobe Illustrator, CorelDraw, Blender.

PORTFOLIO

https://github.com/Pribm

WORK EXPERIENCE

Web Development Experiences:

- Built a hospital scheduling system in Pure **PHP** to my current job, in order to replace some excel sheets, using a **MVC** framework made by myself with composer and **PDO** queries in the model and **AJAX** requests using **JQUERY** in the view side. The code can be found in the following url: https://github.com/Pribm/Sistema_Agendamento_Policlinica;
- Built a CRM for selling cars with **REACT/REDUX**, **Material UI** and **PHP/LARAVEL** in the backend, with the purpose of study the **Eloquent ORM** used in **Laravel**;
- Built a fanmade **SPA** consuming a Rick and Morty API, with the purpose of enhancing studies in **ReactJS**. The Result was published in the following url: https://pribm.github.io/rick-morty-trivia/;
- Developed a Prototype of a social network for musicians with **REACT/REDUX**, **Material UI** components and **Laravel** in the backend. The app is still incomplete, but you can see what is already made in the following url: https://pribm.github.io/Jam_Mate/
